

Parent Outreach:

Milestones & Abilities Ages Zero to Five

February 20, 2025
3:00 p.m. to 4:00 p.m.

Join us as we review developmental milestones and expected abilities for children ages zero to five.

Developmental milestones are behavioral or physical checkpoints in a child's development as they grow. We will review the core milestones all children should be reaching. Abilities are additional skills your child should be developing. In taking a close look at these skills, a child's overall behavior and progress can be monitored. We will also explore learning opportunities that can further enhance your child's overall development. If you notice your child is having difficulty with a certain skill or that something "isn't quite right," then join us for this session where we will be reviewing what steps you can take.

Let us help guide you through developmental milestones in this informative and supportive presentation!

Register Today.
